

Alright I just put it in presentation mode so that should cut down on any background noise. My name is Dan Putnam I am the co-founder and master distributor of Xooma Worldwide.

I want to congratulate you for taking the time to get on this call today. The information I am about share with you can literally change your life. Over the next 15 minutes or so I am going to talk to you about a vehicle or opportunity that can help you take complete control of your financial future.

I have been full time in the network marketing industry now for well over 10 years and during that time have built organizations of over 100,000 people. I am going to tell you how I did it and more importantly how you can do it with a part-time effort and no special skill set, background or experience. I am going to start off by talking about income...

We are going through some very challenging times right now with one of the worst economies most of us have ever seen. Many people are losing their jobs, losing their homes and sometimes there seems like there is no light at the end of the tunnel...but I am going to share with you an opportunity that will make sure you never have to worry about your finances again. I am going to show you how instead of just trading your time for money at a job and only getting paid when you are working, how you can create a long term residual income that pays you over and over on the work you did once...so you get paid month after month, year after year on the business that you build right from your home.

The only vehicle that I know of that gives just about anyone the opportunity to achieve their financial goals regardless of your skill set, back ground or experience with very little money is Network Marketing.

Now I'm not sure what your perception of Network Marketing is, I am sure that some people on this call are already professional marketers and know the power of Network marketing, and I know there might be some of you that have never heard of Network Marketing or do not really understand what this business model is all about. The way I look at it is Network marketing is simply the opportunity to start your own worldwide marketing business from home and work off an established infrastructure.

We are going to teach you some simple marketing techniques to find people who are interested in our opportunity or products, plug them into a system to get all the information they need to make a decision and then the company takes care of everything else for you. They stock the products, ship the products, track and pay all commissions, handle your customer service, give you all the tools to track your business on a daily basis etc... etc...

Now Network Marketing has made some incredible strides over the last 50 years. This industry has gone from being misunderstood by most people to becoming one of the most powerful means of distribution ever. With people like Warren Buffett, one of the richest men in the world, buying network marketing companies and saying it was the best investment he has ever made. And people like Donald Trump using and promoting Network Marketing products on his popular show the Apprentice, or even Oprah Winfrey promoting Networking Marketing products and giving them out in gift bags on one of the most popular talk shows in the world.

On top of that you have some of the brightest minds in the business world like Steven Covey, Zig Ziglar, Paul Zane Pilzer, Brian Tracy, Robert Kyosaki, and many others either participating in Network Marketing or adding it to their books and trainings as the best option for the average to create financial independence.

Now when considering starting a Home based business there are 4 very important aspects that create the ideal opportunity. You have the Corporate Infrastructure. This is very important because if the company is not prepared physically and financially for long-term growth, nothing else matters.

You have the products that you are marketing, the compensation plan, and then the systems and training to help you be successful. Based on these four aspects I am going to explain why I feel Xooma Worldwide is without question the best opportunity.

Starting with the Corporate Infrastructure...Xooma Worldwide is a 15 year old company doing business in over 40 countries and we just launched Xooma Xcel with a one-of-a-kind product and amazing pay plan giving you a once in a lifetime opportunity to work with a rock solid established worldwide company and be one of the first to hear about it. This makes Xooma the perfect Company to partner with and start your own home based business.

Over the last 10+ years that I have worked at home on a full time basis I have seen 4 or 5 products come along that took the industry by storm and the people that heard about it first and took action made fortunes. As marketers, we are always looking for the next big thing. Well, I'm going to tell you about the next big thing and give you the opportunity to be one of the first to hear about it.

Our one-of-a-kind product is called EDGE and is known as the worlds first "energy think drink." This is the kind of product that has the potential to be a billion dollar brand. I have never seen a product that has such instant gratification that people can notice within minutes. It tastes great, it's easy to sample, gives you great energy and contains high quality natural ingredients which have been clinically researched and proven to improve focus, concentration, memory and mood.

Here's the best news. You do not have to be a sales person; you just use this product for personal use, encourage others to try it, and then let our business tools and system do all the work for you. In my opinion, this is the perfect product for a successful business because it places you in front of three of the biggest trends in the market place today—the energy drink market, weight management, and cognitive health.

The product comes in single serving packs that you just add to 16-24oz of water. EDGE has no sugar, no artificial sweeteners and only 10 calories. The ingredients in EDGE have been researched extensively by Dr Kyl Smith who is best known for being the inventor of the best selling supplement in history for brain health. Dr. Smith spent over 4 years researching the foods and natural ingredients that work together to help people obtain the best cognitive health possible so you can perform at your best. After years of

research he put it all in his book Brighter Mind which Xooma utilized to create the world's first Energy Think Drink.

After learning about our Company, Dr Smith joined forces with Xooma Worldwide as part of our Scientific Advisory Board. What makes this so exciting is not only is Dr Kyl one of the world's most respected nutritional researchers he has been featured on hundreds of radio and TV shows throughout North America. He helped create almost 200 million in sales on what became the most popular brain health supplement in North America in just a few short years. With this proven track record of success combined with the power of "word of mouth marketing" through your Xooma business, I believe EDGE will become the next 200 million dollar product.

A wise man once said if you have a product that people want AND a product that people need, you can make a fortune. EDGE is one of those products. Just think to yourself, who do I know that drinks energy drinks, coffee, tea, or any other type of energy or stimulant products. Or who do I know that is trying to lose some weight? Add to that everyone who would like more mental clarity, focus, or maybe even better memory. When you think about it, most people are taking a product or even several products in hopes of receiving the benefits that EDGE can offer. I truly believe this product has more potential than anything I have ever seen.

And while I could spend the next 20-30 minutes explaining how great this product is, the only way you can tell how a product works is to try it for yourself. The bottom line is this...we work with a rock solid company and have an amazing product that people want and need...and it allows us to build a world wide business from home.

Hopefully, one of the main reasons you're on this call is to learn how to make extra money from home. Unlike most "opportunities," I am not going to go into great detail on our compensation plan because compensation plans really are not as important as people think. Let me explain...

For the most part if your business generates a lot of sales volume you will make a lot of money and if your business creates a little sales volume you will make a little money. So instead of focusing on the details of the compensation plan I am going to focus on the 2 biggest problems that keep people from being successful with a home based business and what we have done to solve those problems.

The 2 main problems many people have in their home based business are retention and duplication. In most companies, you are required to sell or consume a minimum of \$100 or more in products just to be eligible to earn commissions and in most companies you'll need to have between 10-30 business partners also moving \$100 or more to make a profit.

At Xooma, we've solved these problems. Not only can you qualify for commissions with as little as a \$25 product order, but more importantly, you can get your business into profit on a monthly basis with as few as 4 business partners. These major improvements will help give you one of the best retention rates in the industry – which means your business will be profitable and continue to pay you month after month.

The other problem I mentioned was duplication...and duplication is the secret to creating a fortune in your home-based business. Without it, you really have nothing more than a sales job.

Duplication gives you the opportunity to create leverage and earn an amazing residual income. Most companies make it very difficult to create duplication because it takes so long to earn money. And if you're like most people, you're listening to this because you want to make money quickly but...like most people, you're busy and need a realistic way to build a successful business with just a part-time effort.

And that's where Xooma's business plan is really different. Our business model is very simple and much easier to duplicate. So the bottom line is this... if you can retain more business and duplicate faster you have a much better opportunity to make money. This is one of the main reasons why so many people experience success in their Xooma business – even if they've never had success before. In fact, you can quickly earn hundreds of dollars extra per month and as you continue to grow your business, you can realistically earn tens of thousands of dollars per month.

I have personally looked at thousands of home-based businesses in the past 10 years and have not found one that is easier to get in profit on a monthly basis and easier to duplicate than Xooma. For more details on exactly how our compensation plan works you can review the information on our website or watch a 10 minute overview video on your computer that explains the 8 different income streams available to you and how easy it is to make money with our Company. You can get that information from the person who invited you to this call.

Now the last thing I am going to talk to you about is our success system. Next to the Company infrastructure, I feel that the system is the most important thing for success.

Over the last 60+ years franchises have proven just how important systems are. Think about it - a McDonalds franchise costs up to one million dollars to start. Next time you walk into a McDonalds look around and see who is running this million dollar business. These businesses are usually run by 16-20 year olds with no special backgrounds, skill sets or experience. So, what's McDonald's secret to success? They have a successful system and they duplicate it. That is exactly the same thing we have done.

We teach you easy marketing techniques that anyone can do to find people that are interested in starting a home based business. Once you have a prospect all you do is use our system to get them the information they need to make a simple business decision. You can do this by giving them a phone number, website address, or printed information. It can really be that easy. You simply invite people to try our products or learn more about our business plan. For example, we do this overview call 7 days a week to help you get the word out and build your business.

Now here's the best part. The person who invited you on this call has a vested interest in your success. The more successful you are, the more successful they will be. Unlike the traditional business world, this is a business where you increase your income by helping other increase their income. And since there are no kits to buy, no fees to join, and a money-back guarantee on all our products, there's virtually no risk in making the decision to get started in Xooma. You simply place a product order to start your business with us.

So, the only decision you need to make after this call is which category you personally fall into...

Category A is you're interested in the business AND the product and want to look at options for getting started.

Category B is you're mostly interested in trying the EDGE product at this point.

Category C is you want to learn more information about the compensation plan or products.

Category D is you have no additional interest.

The global economy continues to get worse but with Xooma you have a very simple and realistic way to create your own economy and create the kind of financial abundance you and your family deserve.

I thank you for your time and for listening to this call I know this information can change your life just like it has mine. Thanks to this business I work from home, have time with my wife and kids, have been able to travel all over the world and spend time doing the things that I love to do...and I know you can do this too. You really have nothing to lose and yet so much to gain.

So, please get back together with the person who invited you to listen to this call and let them know which category you're in – A, B, C, or D. And remember, the only way we become more successful is by helping you become successful. Thanks again for listening...make it a great day.
