

# Silver-Max and Super C&P-Max Silver Micronutrient

It has been reported that the two greatest causes of chronic disease are lack of minerals and oxygen deficiency, resulting in impaired oxygen metabolism. It states in the book, "Noble Metals in Biological Systems," that there is a correlation between low silver levels in the body and sickness. In today's world, mineral supplements are absolutely necessary to maintain good health.

Prior to 1938, colloidal silver was considered one of the mainstays for antibacterial treatment. It was successfully injected at 1 to 1½ cc every other day for chronic conditions. For normal maintenance, it was injected twice a week intramuscularly and/or intravenously. It has also been used as a mouthwash and gargle, a douche, ingested orally and applied topically, even used for sensitive tissues, like with burns, etc.

If you like the benefits of Colloidal Silver you'll love Silver-Max and Super C&P-Max Silver Micronutrient by HTN. They are engineered and a step above colloidal forms. They are in a true *clustoidal* form, having no negative side effect nor causing any type of toxic buildup. No matter how much or how long you use a silver micronutrient, once you stop, it leaves the body within 48 hours.

Clustoidal Silver Micronutrient stands alone. The silver clustoid has a spherical shape, enabling it to hold its positive charge. The positively charged silver ions are

attracted to negatively charged, "bad" bacteria (opposites attract). The good bacteria, having a positive charge, are not attracted to nor affected by the positively charged silver clustoids. So, the positively charged particles will not adversely affect good bacteria or the healthy flora of the gastrointestinal tract.

**No matter how  
much or how long  
you use a silver  
micronutrient,  
once you stop, it  
leaves the body  
within 48 hours.**

The size of the silver clustoid is 1/10 to 1/100 of a micron...small enough to effectively help the body clear bad bacteria, viruses, fungi, parasites, candida, enhance the lymphatic system and promote optimal health at a cellular level. Because of this tiny size, the spherically shaped clustoids more easily penetrate pathogens and cells. Silver-Max at around 10 ppm and Super C&P-Max Silver Micronutrient at around 20 ppm, contain no stabilizers, just clustoids of silver suspended in pure water, with the water having a very low surface tension so it's actually "wetter."

Make sure you get the suggested usage sheet when you purchase either product. You can get Silver-Max and Super C&P-Max Silver Micronutrient only at HTN. Silver-Max and Super C&P-Max Silver Micronutrient promote health more rapidly and over a broader range of conditions than all other silver products tested. Silver-Max and Super C&P-Max Silver Micronutrient are truly in a league of their own. So, try them for yourself and be the next one to share your success story with us.

## MANY MEDICAL BENEFITS

There is no known disease-causing organism that can live in the presence of even minute traces of simple metallic silver. Based on laboratory tests, destructive Bacteria, Virus, Fungi, Candida, Parasites and Spirochetes are killed within minutes of contact. Larry C. Ford, M.D. of the Department of Obstetrics and Gynecology, UCLA School of Medicine, Center for the Health Sciences reported in a letter dated November 1, 1988...

"I tested (the silver solutions) using standard antimicrobial tests for disinfectants. The silver solutions were antibacterial for concentrations of 10<sup>5</sup> organisms per ml. of Streptococcus pyogenes, Staphylococcus aureus, Neisseria Gonorrhoea, Gardnerella Vaginalis, Salmonella Typhi, Candida, M. Furfur, and other enteric pathogens."

Larry C. Ford, M.D.
